

100% NATURAL

BUG BOUNCER

Safe, All-Natural, Homeopathic
Insect Repellant

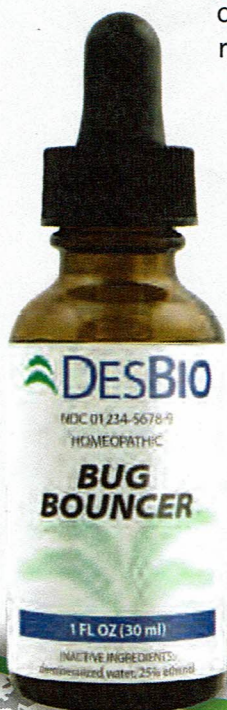

Bug Bouncer helps reduce the frequency and severity of bug bites. It helps prevent a wide variety of bites, including those from:

- mosquitos
- ticks
- sand flies
- noseiums
- black flies
- bed bugs
- head lice

Bug Bouncer is an oral homeopathic remedy. Put 10 drops under the tongue 30 minutes before going outside, and enjoy 2-3 hours of natural bug repellant properties.

Because it is a homeopathic formulation, there are no harmful side effects, toxic fumes, or unpleasant scent. It's safe for all ages!

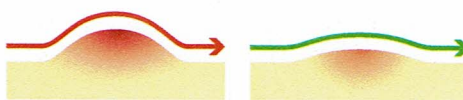

No More Toxic Bug Spray!

Mosquitos, ticks, and other pests can sometimes keep you from enjoying the outdoors to the fullest. Though typical spray repellants keep the bugs away, they can be a toxic blend of chemicals that you don't want to put on you or your family. *Bug Bouncer* is a safe, all natural homeopathic insect repellant.

Bug Bouncer utilizes the repelling properties of the Delphenium plant (*staphysagria*), which repels mosquitos naturally. *Bug Bouncer* tricks bugs into thinking you are a giant delphenium flower so they stay away!

When bug bites do occur, *Bug Bouncer* reduces swelling, burning, and itching with a blend of time-tested homeopathic ingredients.

Bug Bouncer contains five homeopathic remedies:

- Grindelia
- Urtica Urens
- Ledum Palustre
- Staphysagria
- Cedron

Delphenium flowers are natural insect repellants
