

just say No to generic flip-flops.

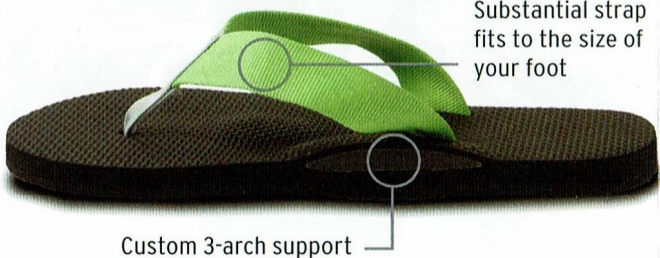

Traditional flip-flops may be easy to slip into when the weather turns warm, but they're not so easy on your feet and Kinetic Chain. In fact, those flat-as-a-board, store-bought flip-flops can do serious bodily damage. They may even be the cause—or at least a contributing factor to—your foot, leg, knee, or back pain.

Traditional flip-flops tend to be flat and offer little to no support for your foot's 3 arches.

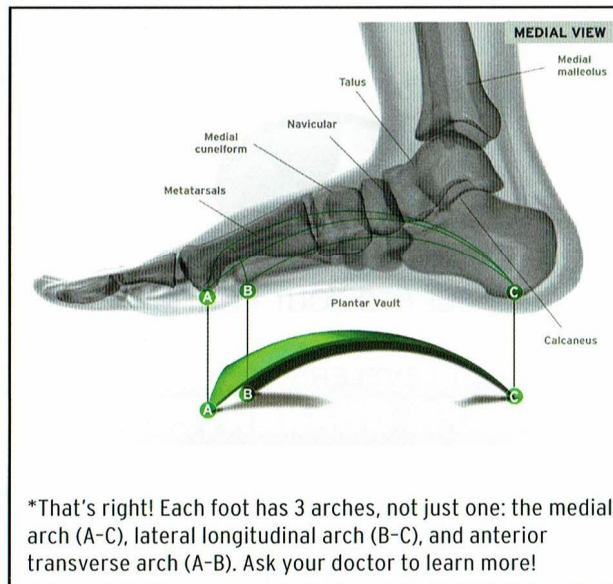

Cheap "off the shelf" flip-flops

Foot Levelers custom orthotic flip-flops

Foot Levelers flip-flops are different. They're custom-designed just for you, based on a 3D foot scan or cast and your doctor's treatment plan. And only Foot Levelers flip-flops include a built-in, custom orthotic that supports all 3 arches of the foot* for the healthiest support on the planet.

- So comfortable you won't want to take them off—because they're made just for you
- Custom-made with 3 Arch Advantage™ support, which accommodates your feet's natural arches
- Can help reduce stress, pain, and fatigue in the feet and throughout the body
- Foot Levelers' products are backed by 65 years of experience and dozens of research studies
